

• A BRIEF ACCOUNT

I build things with AI.

I came to software through problems I wanted to solve. Most of them involved accessibility — tools that should have been better but weren't. I decided to make some that were.

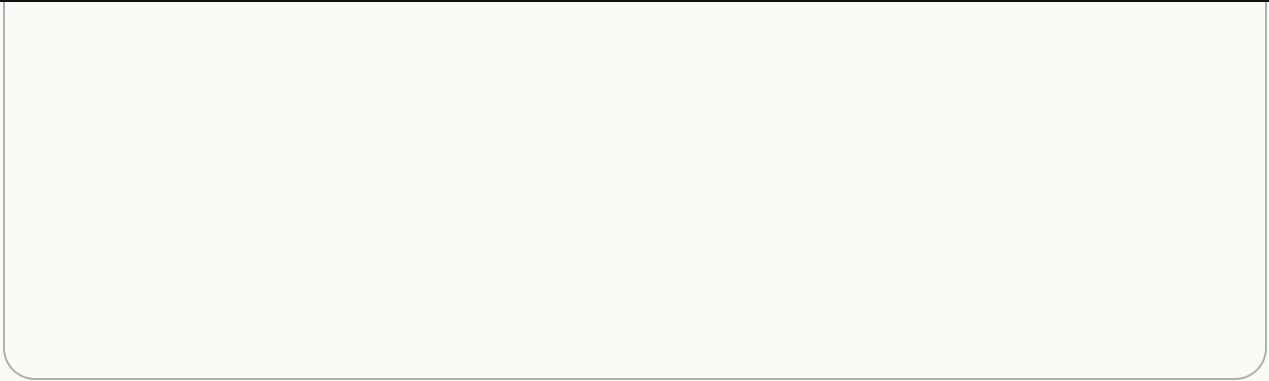

“

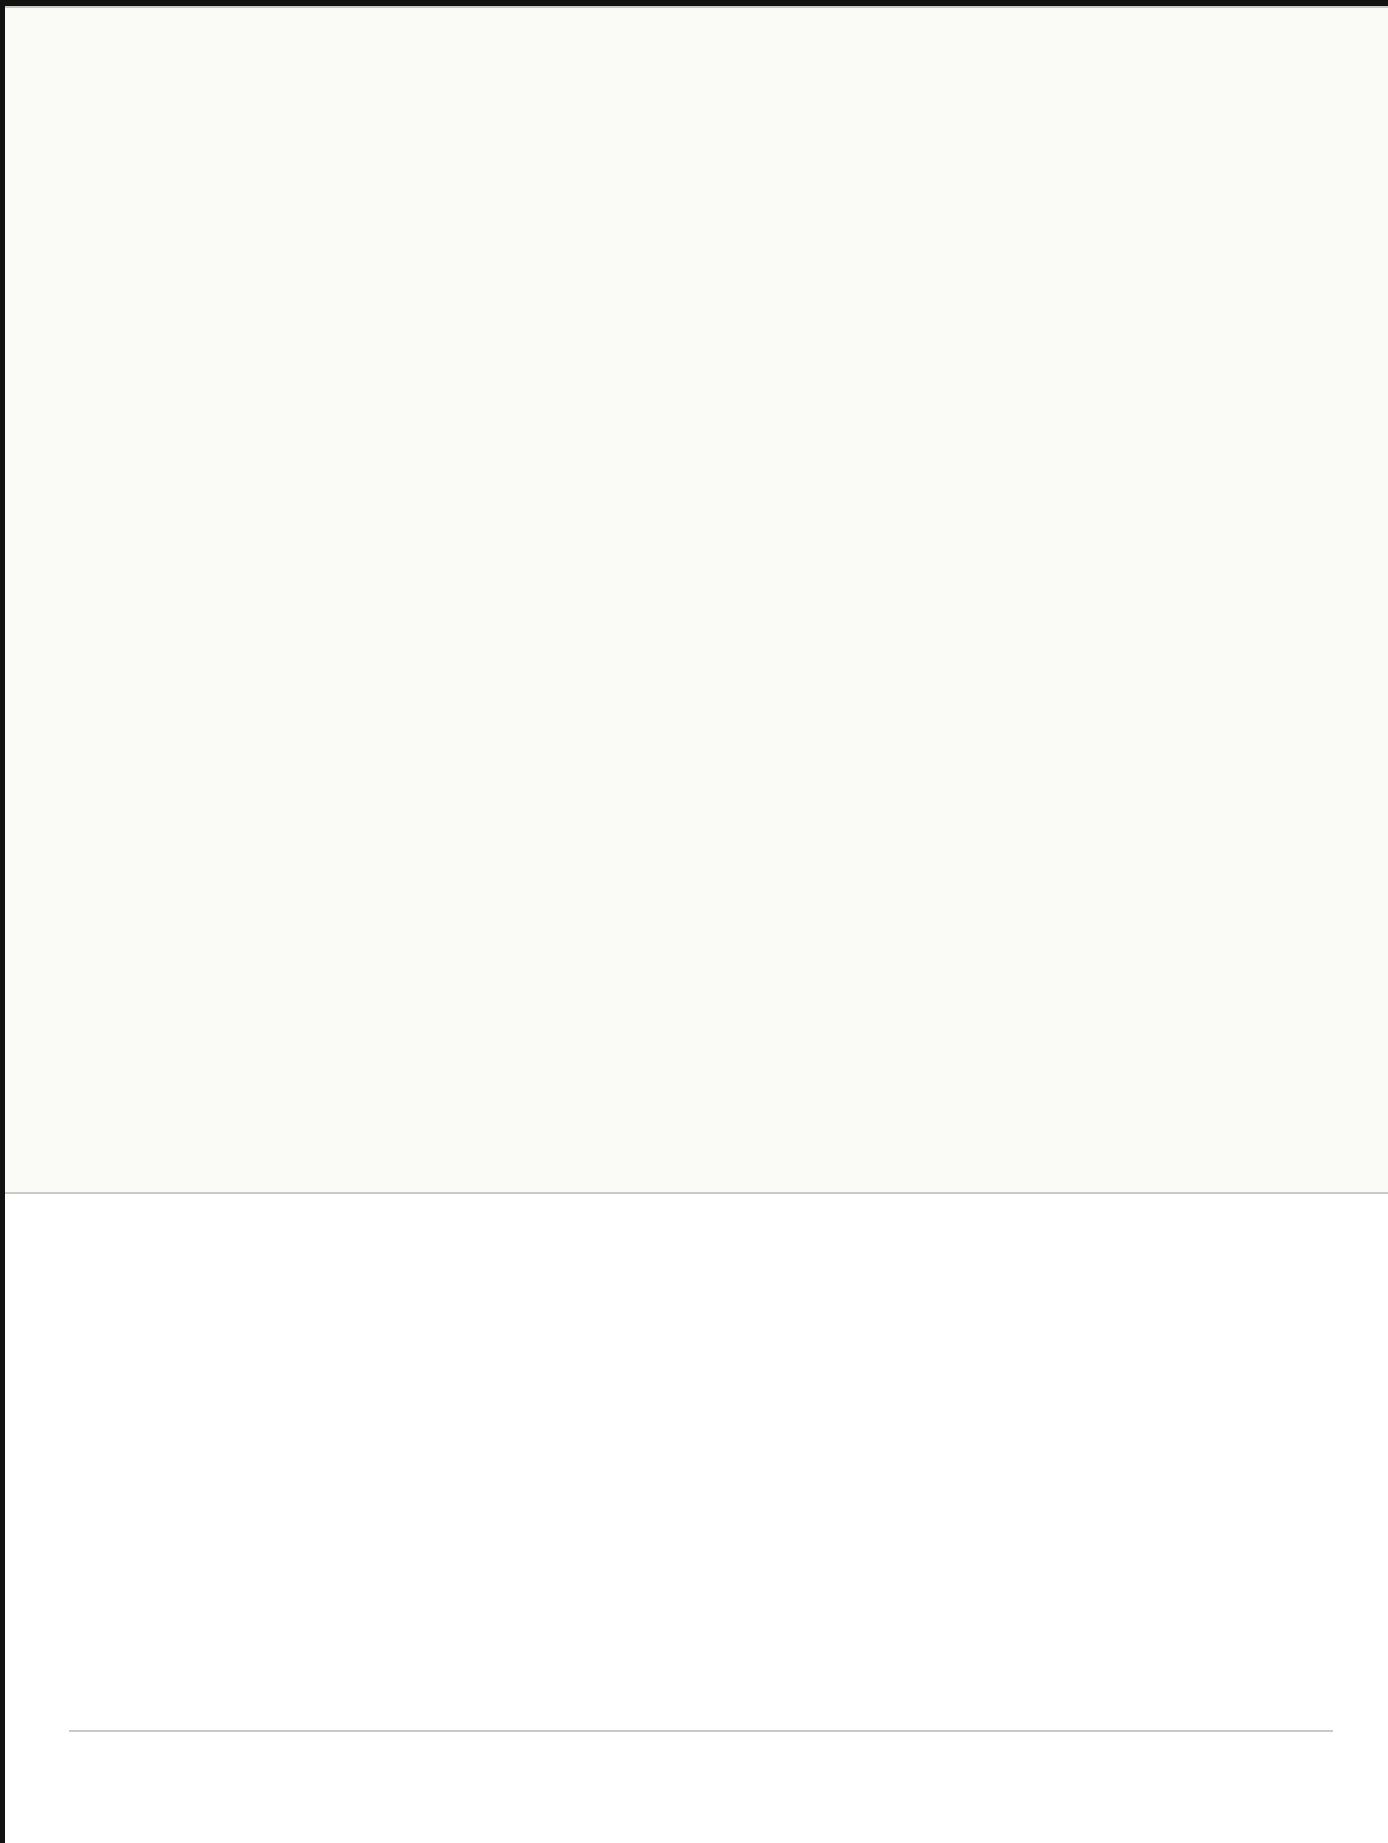

Accessibility is not an add-on. It is where you begin.

I work from Canada. Mostly on AI-assisted tooling, accessibility infrastructure, and community software. I prefer learning in public.

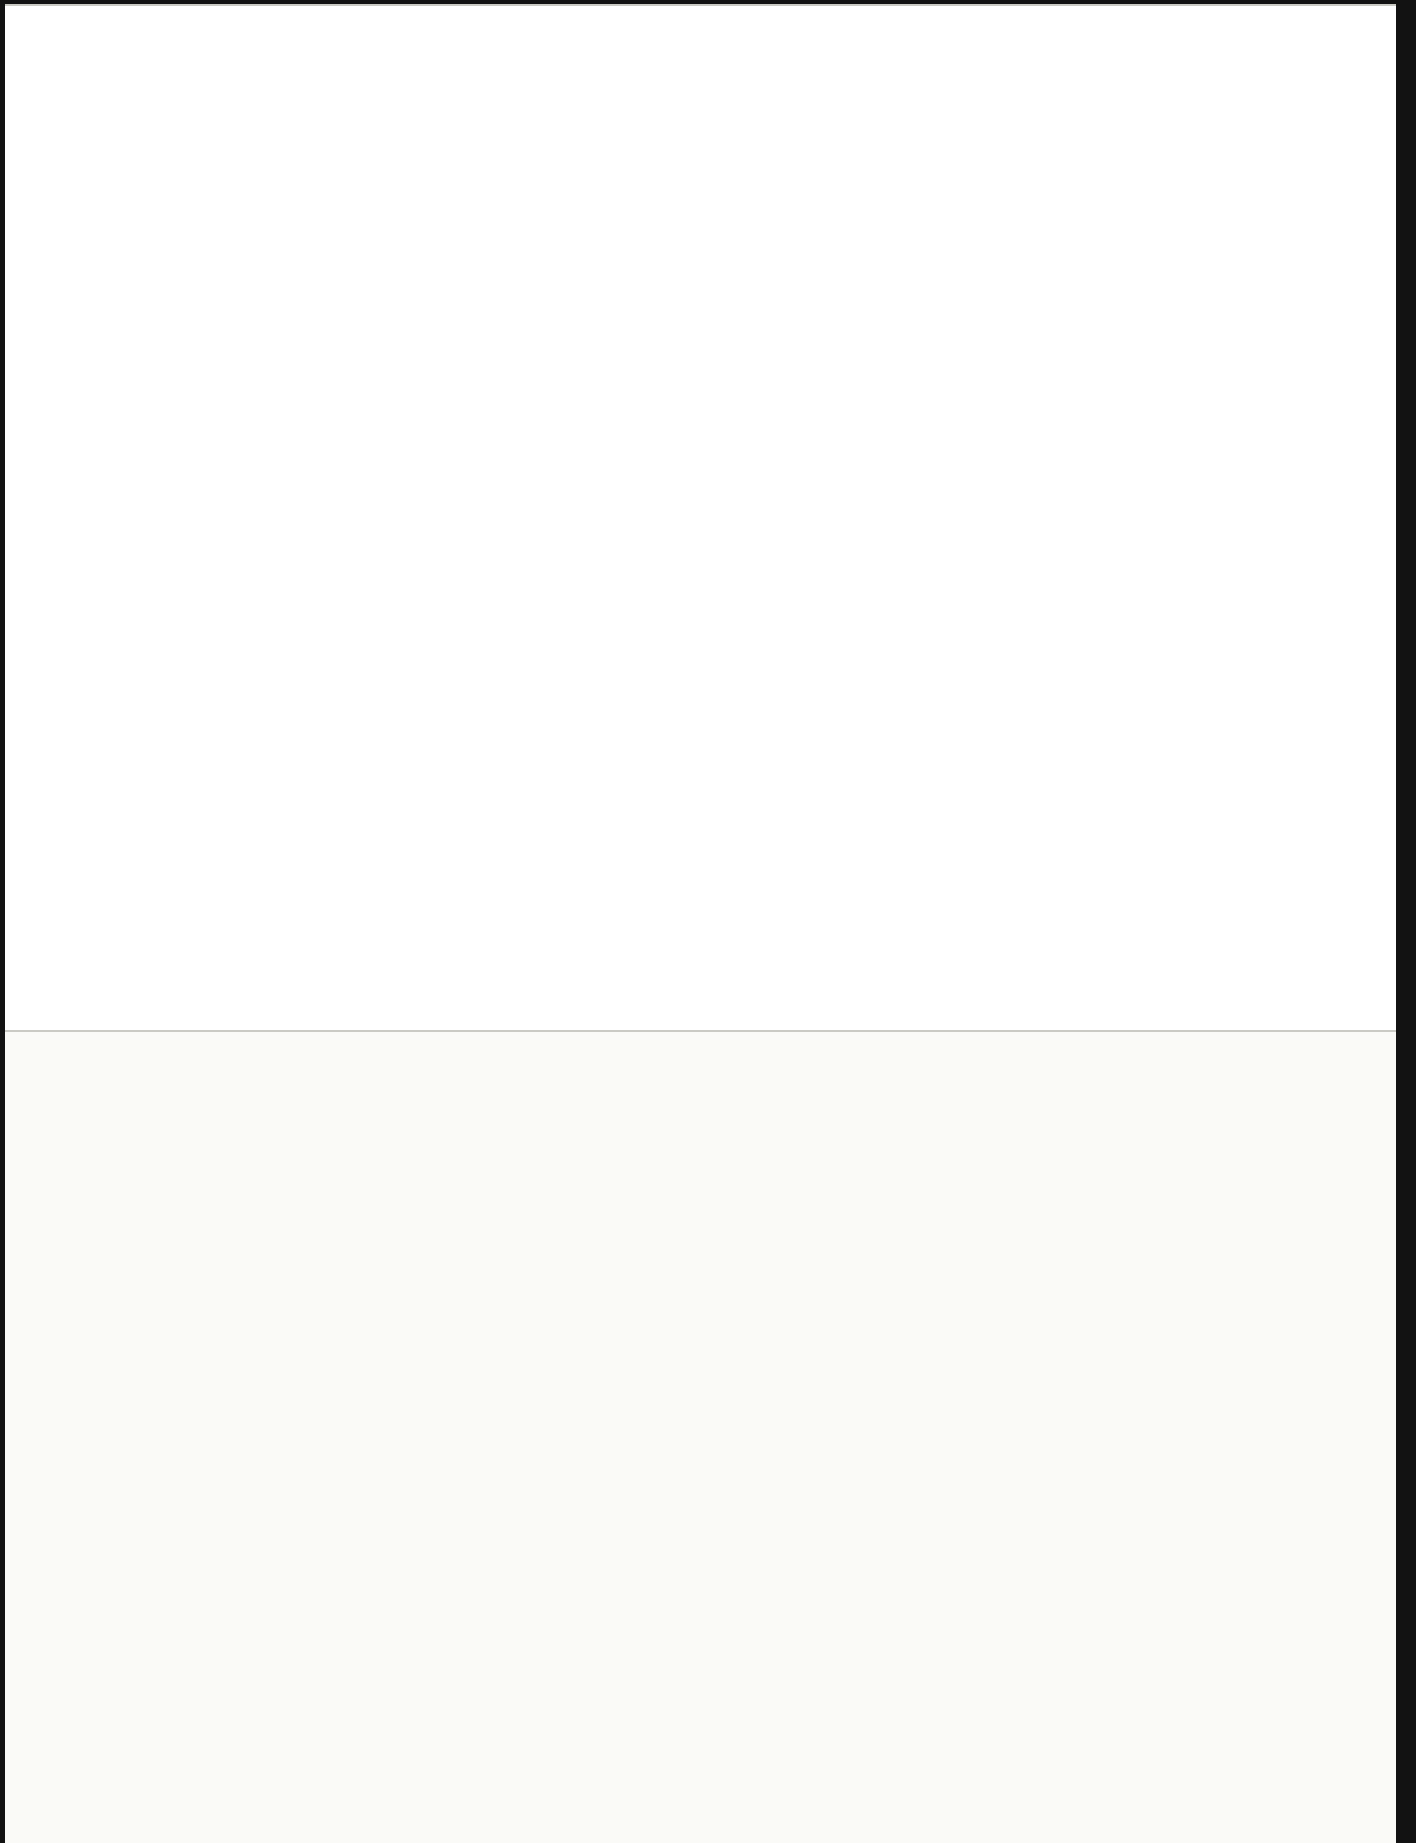

I keep a written record of how each thing was made. The documentation is part of the deliverable, not an afterthought.

Right now: an accessibility map. A multi-agent system that ships real commits. A local-first prompt manager. A community mesh built for privacy. A command-line trainer. All of them open source.

ALL THE WORK →

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 15.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000). The increase in the number of people aged 65 and over is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of immigration.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's health and social care system. The number of people aged 65 and over who are in need of health and social care services is expected to increase from 1.5 million in 1990 to 2.5 million in 2020 (Office for National Statistics 2000). This increase is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of immigration.
