Building AccessMap — A Lesson in Shipping Something That Matters

How I built a crowdsourced accessibility mapping app with Expo and Supabase — the technical decisions, the hard parts, and what actually shipped.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics 2000). The number of people aged 65 and over in the UK is projected to increase from 10.5 million in 1999 to 12.5 million in 2010, with the number of people aged 75 and over increasing from 4.5 million to 6.5 million in the same period (Office for National Statistics 2000). The increase in the number of people aged 65 and over is projected to be particularly marked in the 75–84 age range, with the number of people in this age range increasing from 1.5 million in 1999 to 2.5 million in 2010 (Office for National Statistics 2000).

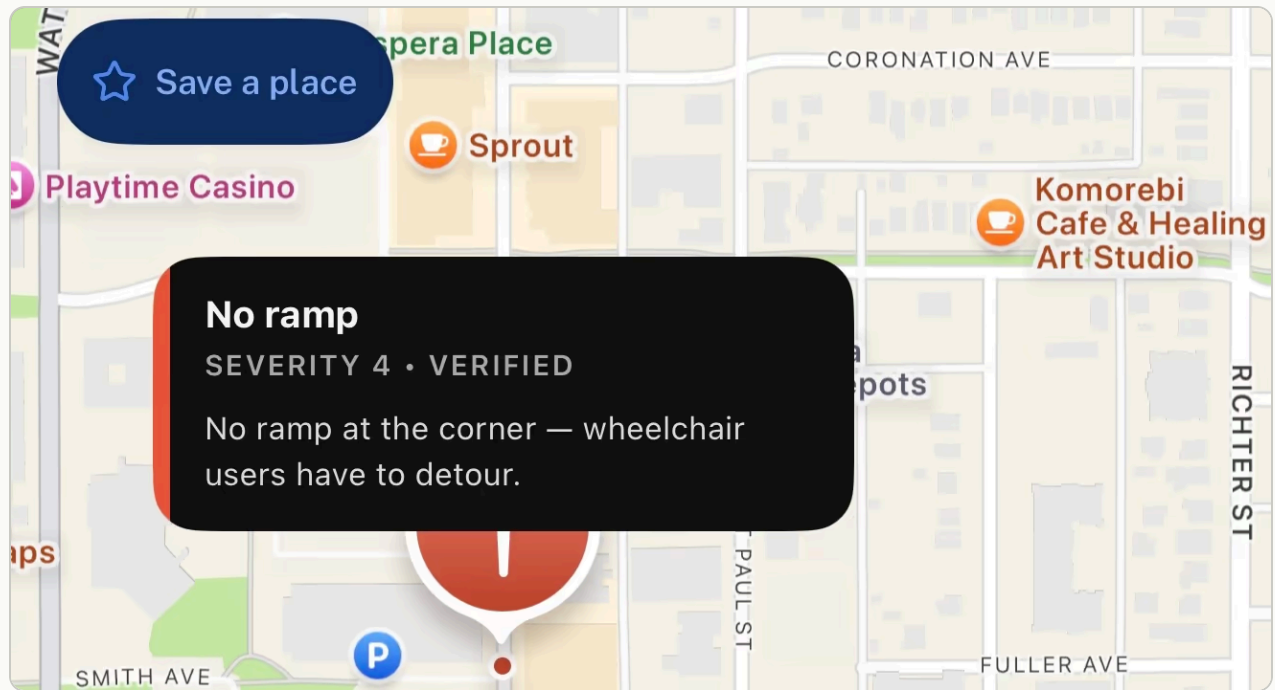

There is a growing awareness of the need to address the health and social care needs of the ageing population. The World Health Organization (WHO) has identified ageing as one of the major public health challenges of the 21st century (WHO 1999). The WHO has developed a framework for ageing, which focuses on the need to address the health and social care needs of the ageing population in a holistic manner (WHO 1999). The WHO framework for ageing is based on the following principles: (1) the need to address the health and social care needs of the ageing population in a holistic manner; (2) the need to address the health and social care needs of the ageing population in a community-based manner; (3) the need to address the health and social care needs of the ageing population in a multi-sectoral manner; and (4) the need to address the health and social care needs of the ageing population in a sustainable manner (WHO 1999).

The WHO framework for ageing is based on the following principles: (1) the need to address the health and social care needs of the ageing population in a holistic manner; (2) the need to address the health and social care needs of the ageing population in a community-based manner; (3) the need to address the health and social care needs of the ageing population in a multi-sectoral manner; and (4) the need to address the health and social care needs of the ageing population in a sustainable manner (WHO 1999).
