● FEATURED ● SOLO BUILDER

AccessMap

Mobile app for flagging accessibility barriers — broken ramps, missing tactile paths — pinned to a real city map. Privacy-first: no tracking, no data sold.

● [LIVE MAP ↗](#)

SEVERITY 4 · VERIFIED

No ramp at the corner – wheelchair users have to detour.

TKTK_ACCESSMAP_TEST_COUNT TESTS PASSING · NOT YET

RECONCILED – METHOD

Placeholder – not a shipped figure. The homepage chip says 1,680; this repo's CI says 1,120; the local suite runs closer to 1,857. One artifact-backed count gets pinned here, with a link to the run that proves it. (Separate from the portfolio's own measured 325 on the accessibility page.)

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office of National Statistics 1999). The increase in the number of people aged 65 and over is expected to be the result of a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's health and social care system. The number of people aged 65 and over who are in need of health and social care services is expected to increase significantly in the coming years. This is because the number of people aged 65 and over who are in need of health and social care services is expected to increase as a result of a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information research' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information practice' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information theory' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

the 'information' and 'communication' fields. The 'information' field is defined as:
